

THE COMMITMENT OF FRENCH-SPEAKING SUPREME AUDIT INSTITUTIONS TO THE SUSTAINABLE DEVELOPMENT GOALS

Meeting in Romania in July 2023, Aisccuf affirmed seven principles defining and guiding the role of SAIs in achieving the SDGs

1 A systemic framework

SDGs constitute a common international framework for public policies that SAIs are responsible for auditing.

SAIs must incorporate SDGs as an analytical grid in their audits and evaluations of public policies.

3 Public debate and accountability

SDGs are a tool for promoting the work of SAIs and contributing to public debate and information.

- Strengthening transparency and control of public spending in line with the 2030 Agenda
 - 2 A common language to control sustainable development issues
 - 3 A role to be strengthened in the development of voluntary national reviews
 - The operationalization of SDGs is essential to the quality of audit work
 - Making societies more resilient to crises by integrating SDGs into SAIs audits

The key role of SAIs in achieving SDG 16

Publish and publicize the work of SAIs to strengthen their impact on citizens
